

April 11, 2022

Dear valued customer,

As part of an ongoing meat, resource and supply review as well as issues discussed surrounding our bird health issues, we have made the difficult decision to suspend the following Ready to Cook Roast codes. This is a difficult decision but one we feel is necessary under the current/projected supply constraints.

<b>MPC</b>	<b>Description</b>
2265570016	BB Foil Roast
2265570097	BB Netted Roast
2265570131	BB Petite Roast

These suspensions are effective immediately covering current open orders at the time of this letter. As discussed, we will continue to produce roasts in a limited capacity with the intent to better fulfill your needs in Q4 when the roast demand is at its highest. We will build towards Q4 2019 volumes and monitor the production while keeping you informed of our progress periodically. In early August we will schedule a formal review of the inventory and work with you on how we will execute releasing the product with PO's beginning in September.

We will manage the remaining meat portfolio, primarily cooked deli breasts, reviewing forecast/demand plan and normal order patterns to not allow for "trading" of volume from the suspended items. To be successful to Q4, we must reduce volume.

Please advise if we can work with you on any communication beyond this letter or how we can assist further.

Thank you,

Richie Jenkins  
Sr. Director of Business Development/Marketing
